

Army inventory sheet 1750

this particular listing is. Column numbers A through F run across DD Form 1750. Because Box numbers D, E and F are used to enumerate quantities, there is a horizontal legend above those boxes titled "QUANTITIES REQUIRED". Beneath each box run column lines that extend almost to the bottom of the page. Column A is filled in if the total package is contained in more than one shipping box. It will indicate which box the item described in this row is contained. Column B describes the particular item in the package. The preferred entry is a Federal Stock Number (FSN). Column C is simply the Unit Of Issue for the item. The last three columns under "QUANTITIES REQUIRED" are optional. They indicate if the item is required for the complete unit being packed to function, or if they are spare parts. Finally, the last row of DD Form 1750 is a place for the packer to print and sign.
